

NORRIS BT600 DISHMATE

Economy pass through dishwasher

Winner of two Australian Design Awards:

With the BT600 Elite Series Dishwasher, Norris offers an economy model machine with all ease of operation only found in a pass through design. In developing this machine, Norris has applied its extensive experience gained from over 40 years of manufacturing dishwashers specifically designed to suit Australia's unique and varied conditions. It continues in the tradition that has won Norris two Australian Design Awards.

Versatile:

The machine has a fixed ninety second cycle which is sufficient for washing most items as well as a manual wash cycle which subjects the load to extended wash periods for the removal of more heavily baked on substances. This allows the BT600 Elite dishwasher to process a wider variety of items.

Economical:

The BT600 offers savings for the buyer who wants a medium capacity pass through dishwasher and who has a good hot water supply with water pressure above 275kPa*. The machine has a recirculating wash system, which reduces hot water usage to 3.5 litres per cycle.

High Performance:

A powerful 560W wash pump sprays water above and below the load via rotating stainless steel wash arms. Top and bottom rinse arms then provide efficient rinsing and sanitising from the mains pressure copper booster tank.

Conformance to Health Regulations:

An internal interlock will prevent the machine from operating unless the temperature required by regulation has been reached. Clearly legible wash & rinse water temperature gauges, allow the operator to confirm that the machine is operating within the prescribed range. The hood has a safety cut-out which halts the cycle if it is raised during operation.

Ergonomically Friendly:

The convenient bench height passthrough operation, eliminates the need for operators to bend over during loading & unloading. By simply raising and lowering the handle all cycles are initiated automatically.

Installation:

The BT600 is designed to be installed for either a straight through, corner, or a front only operation.

Durable:

All stainless steel cabinet construction, including wash arms and scrap trays offers better protection against harsh detergents and hot water. The scrap trays and pump filter protect the washpump and prevent blockages in the washarms. At Norris we are so confident in the strength of the machines, that we offer a five-year warranty on the cabinet.

Easy to Maintain:

Norris has deliberately refrained from using electronics in their machines. All controls are electromechanical and are readily available. This ensures that should your machine ever need servicing a local tradesperson will be able to get you up and running with minimum disruption and cost.

Service:

Norris machines are supported by a nationwide network of service agents.

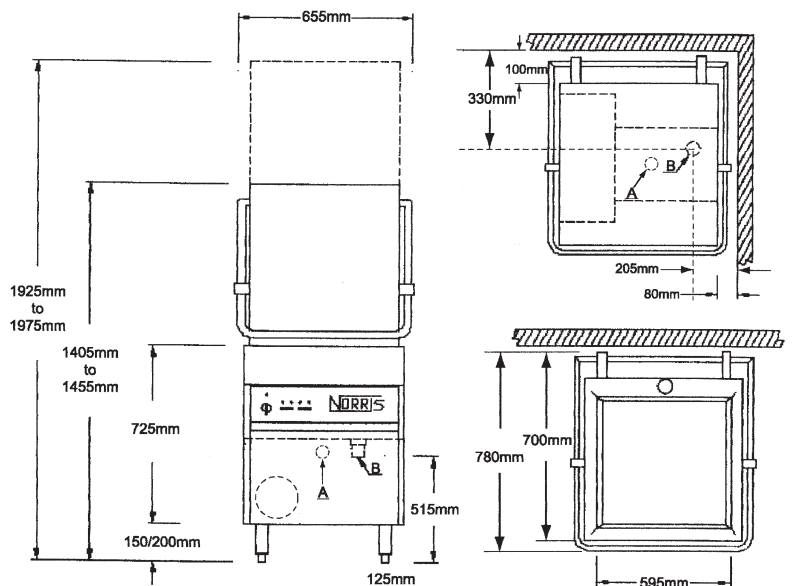

*Water pressures below 275kPa are not recommended for this model.

**Dependant on incoming hot water temperatures & wash cycle selected.

***For pressures above 400kPa a pressure limiting valve must be used.

Dimensions	
Height Cabinet inc. Legs	1405 – 1455mm
Height Hood Open	1925 – 1975mm
Leg Height	150 – 200mm
Width Inside Wash Tank	595mm
Width with Handle	660mm
Depth	700mm
Depth Including Handle	780mm
Load Height	875 – 925mm
Usable Wash Height	330mm
Basket Tray Size	500 x 500mm
Capacity	
Loads per Hour	Up to 35 **
Wash/Rinse Pump	560 Watts
Wash Tank Capacity	22 Litres
Rinse Boiler Capacity	12 Litres
Wash Tank Element	0.6 kW
Boiler Tank Element	2.4 kW
Wash Temperature	55° – 65°C
Rinse Temperature	82° – 88°C
Total Cycle Time	90 Sec – manual
Wash Cycle Time	70 Sec – manual
Rinse Cycle Time	15 Sec
Hot Water Usage per cycle	3.5 Litres
Plumbing Connections	
Hot Water	20mm (3/4") BSP Flexible Hose
Waste	50mm (2") BSP
Water Pressure	275 – 400 kPa ***
Water Flow Rate	15 Litres per Minute
Electrical	
Volts/Hz/Amps	230V AC 50 Hz 15amp

- (A) Hot Water Solenoid
- (B) Gravity Drain Waste
